Job title: Technical Laborer

Location: Alabaster, Alabama

About the Opportunity:

During the past 31 years, ICT has built a worldwide reputation as a results-oriented company in the areas of pulverizer and boiler testing, combustion troubleshooting, consulting, and training services to the power industry. We excel in the areas from the pulverizer to the stack because we understand power plant processes and operations. As a complement to our core business, we offer a full array of diagnostic and compliance environmental testing services as well as operating a pilot scale SCR catalyst testing laboratory.

Innovative Combustion Technologies, Inc. provides a unique environment that fosters individual growth and rewards performance to our productive team members.

Position Description:

Minimum of 50% of total time is spent in the field providing support services and performing general errands for other team members. He/she will also assist the field service specialist and technicians in setting up and removal of test equipment at the testing location with the remaining time devoted to performing building maintenance, cleaning vehicles, loading and unloading equipment from vans and trailers, etc. in our Alabaster office when no field work is being performed.

Qualifications:

- Ability to work in a dirty and hot (extreme heat: 100°+ at times) environment climbing stairs and ladders
- Ability to lift approximately 100 lbs.
- Hard working
- Dependability
- Ability to travel (includes some weekends)
- Clean driving record/valid Driver License
- Clean background check
- Drug Free
